

**EXCEPTIONAL
DRYING
SOLUTIONS.**

A PROMISE OF PERFORMANCE.

You can count on ADC® dryers to deliver exceptional results day in and day out, whether you operate in a vend, on-premise or industrial environment. It has always been our goal to design, engineer and manufacture hardworking commercial and industrial dryers that set a standard for durability. It's a dedication to excellence that has enabled us to serve customers in over 50 countries for over 50 years. And a devotion to delivering drying solutions that meet your high standards.

DEDICATION

Dedicated to designing and manufacturing exceptional drying solutions for commercial and industrial use.

EXPERTISE

Refining and advancing drying technology for more than five decades.

CONSISTENCY

Hardworking drying solutions delivering reliable results day in and day out even in tough environments.

BENEFIT FROM THE POWER OF OUR PEOPLE.

Over the years the ADC name has become synonymous with performance. In addition to our exceptional technology and engineering prowess, we believe it's our people that can provide the greatest benefits to your business. That's why at ADC, we give you access to a global network of laundry professionals. Dedicated individuals who are not only committed to your success but are every bit as hardworking as our dyers.

“ The ideas we've advanced and machines we've created over the years are truly impressive. We have a proven track record of developing drying solutions that meet our customers' needs and deliver results that benefit their businesses. It's a history and heritage we're extremely proud of.”

EAMON C. LYONS, MECHANICAL DESIGN ENGINEER LEAD

DRYING IS IN OUR DNA.

For more than five decades, ADC has been advancing drying technology, helping our customers increase efficiency and improve performance in their businesses. We've built a reputation for developing many firsts and bests. From patenting coin operated dryers that automatically reduce heat usage to creating the first commercial dryers with the Sensor Activated Fire Extinguishing (S.A.F.E.) System, our machines not only set the standard for what dryers could be but also for what they should be. There's practically no drying challenge we can't help your business overcome.

1988: Improved dryer heating cycle monitoring by integrating safety features into its microprocessor computerized controlled system.

2002: First commercial dryers to use the Sensor Activated Fire Extinguishing (S.A.F.E.) System, an integrated water-based fire protection system.

2009: Patented coin operated dryers with sensors to automatically reduce heat usage, helping avoid overdrying.

2014: First-of-its-kind intelligent airflow design for improved dry times and drying efficiency with the Automatic Airflow Compensator System.

ENGINEERED FOR DRYING EXCELLENCE.

Building on our time-tested heritage as a world leader in drying solutions, our broad range of equipment available today has been engineered to meet many different modern commercial and industrial laundry needs. From dryers that can be custom programmed to ones that automatically shut down when they sense a load is dry, you can count on ADC® machines to keep up with the daily demands of your business.

i-SERIES DRYERS

SINGLE: 35 lb – 120 lb | STACKED: 30 lb – 45 lb

VEND

i-Series dryers offer the ultimate versatility and customization to help you **maximize your laundromat's potential** revenue and turnover. We've designed the i-Series to meet the demanding needs of owners, delivering consistent performance, optimized dry times and reliable operations.

ON-PREMISE

The i-Series dryer lineup is designed with the versatility needed to help **improve laundry room throughput**. i-Series on-premise dryers are also purpose engineered to help save money on utilities, payroll and maintenance.

MORE ABOUT THE I-SERIES:

- Standard stainless-steel basket and front panel helps protect against corrosion.
- Intelligent Inverter Drive: Alternates the speed of the drum throughout the cycle, allowing for a soft controlled start and optimized tumbling during drying. The inverter drive also features a simple and reliable single drive belt system making for easy serviceability.
- Fully Insulated Cabinet: The preheat function helps to recover heat that is typically lost into the room by diverting it into the burner to warm the incoming air.
- Sensor Activated Fire Extinguishing (S.A.F.E.) System: A controlled extinguisher that automatically detects fires in the dryer, douses them with water and alerts you that the system has been activated. This system helps to protect your facility whether the dryer is in operation or in an idle state. (NOTE: This feature is exclusive to on-premise dryers.)

AD SERIES DRYERS

SINGLE: 35 lb – 200 lb | STACKED: 20 lb – 45 lb

VEND

Time-tested top-to-bottom quality and the ability to customize your build have made our AD Series dryers a popular choice for laundromats worldwide. AD Series dryers are user-friendly and reliable machines that can help you **improve the laundromat experience** for your customers.

ON-PREMISE

From hotels to hospitals and nursing homes to health clubs, AD Series dryers are user-friendly and reliable, helping businesses **maintain lower laundry room overhead** as well as provide for smoother day-to-day operations.

MORE ABOUT THE AD SERIES:

- Computer Operated:
 - Built with easy-to-read LCD screens and a user-friendly multilingual interface for simple operation.
 - Our advanced technology allows for self-diagnostic controls, which constantly monitor and give you up-to-date details and information on your machine.
- Payment Options: Provide vend customers with payment options like the standard preconfigured mechanical coin drop, configurable multi coin drop and the card reader ready option. And as times change, you can change your method for receiving payments as well.
- Sensor Activated Fire Extinguishing (S.A.F.E.) System: A controlled extinguisher that automatically detects fires in the dryer, douses them with water and alerts you that the system has been activated. This system helps to protect your facility whether the dryer is in operation or in an idle state. (NOTE: This feature is exclusive to on-premise dryers.)

SOLUTIONS FOR SPECIALIZED SITUATIONS.

INDUSTRIAL DRYERS

SINGLE: 200 lb – 460 lb

Offering size, economy and a reputation for being hardworking, our large capacity industrial dryers are designed to **meet the most demanding applications**. No matter your capacity needs or environment, chances are we have a configuration that will give you the fast and efficient drying solutions you're looking for.

MORE ABOUT INDUSTRIAL EQUIPMENT:

- Full-Featured: All our large capacity dryers come standard with computer controls, lint collection systems and other critical features competitors consider to be add-ons.
- Self-Cleaning Blower System: Directs compressed air at the fan blades at the end of each cycle to remove lint buildup.
- Front Lint Drawer: Unlike other manufacturers, we put the lint drawer in front of the exhaust fan to prevent lint from clogging the fan, eliminating the need for costly external lint collectors.
- Anti-Wrinkle Feature: Standard on our largest capacity AD-464 is our unique anti-wrinkle feature that continues to tumble a load without heat after a cycle is finished until it can be unloaded.

SPECIALTY DRYERS

FIVE OR SIX-GEAR CAPACITY

Our EcoDry Firefighter's Gear Dryer Cabinets are energy efficient and **designed to prolong the life of gear**. Unlike traditional tumble dryers that may not be able to effectively dry heavier, bulkier garments, they allow for gear to be hung inside so warm air can circulate through coats, pants, gloves and boots.

MORE ABOUT SPECIALTY EQUIPMENT:

- Intelligent Controls: Phase-7 microprocessor takes the guesswork out of drying. With six factory presets and the ability to add and modify additional cycles, one touch is all it takes. Depending on the number of items, the dryer can be set to dry for up to four hours.
- Heavy-Duty Construction: Cold-rolled steel sides, door panels and reinforced base. Finished with a durable powder coating, baked on at 425°F to ensure years of performance under the heaviest conditions.
- Directed Airflow: Designed to hold up to six sets of gear, the unique airflow pattern is delivered using two separate blowers and ensures that warm air penetrates even the tightest areas.
- Available Accessories: Optional glove hanger, boot hanger and adjustable shelf.

WE'RE READY TO GET TO WORK FOR YOU.

For more than 50 years, ADC® dryers have led the industry by performing consistently and reliably, day in and day out. But for us, it's not just about designing hardworking dryers, it's also about working hard to provide you with exceptional support. You can count on our global network of commercial and industrial laundry distributors who are dedicated to serving our customers in over 50 countries. Because the reason we build better dryers is ultimately to help you build a better business.
